# HARDSCRABBLE

A hardcore survival overhaul inspired by MITE (*Minecraft Is Too Easy*). No logs with bare hands, metal-by-metal progression, real hunger, 29 new monsters and a dimension under the bedrock.

0.1.0-alpha | GitHub | Modrinth | CurseForge

| 29 | 78 | 9 | 32 | 3 ♥ |
|---|---|---|---|---|
| new mobs | tools and weapons | workbenches, one per metal | days between blood moons | to start with |

A question, need a specific screenshot or a test world ready to film? Message me, I answer quickly.

## VIDEO ANGLES

### SURVIVING THE FIRST 10 MINUTES

You can't punch a tree. Find flint in gravel, make a hatchet, and get through the first night on 3 hearts while zombies dig their way to you.

### FROM FLINT TO ADAMANTIUM

Flint, copper, silver, iron, ancient metal, mithril, adamantium. Each metal needs its workbench and a hot enough furnace. A ready-made progression series.

### MITE, 2026 EDITION

For those who played MITE on 1.6.4: the original mod's rules, rebuilt on Minecraft 26.3 with original models and textures. The before/after comparison speaks for itself.

### BLOOD MOON NIGHT

Every 32 days the moon turns red and the undead go into a frenzy. Ghouls, revenants, bone lords: one night to hold out, live.

### UNDER THE BEDROCK: THE UNDERWORLD

A portal built on bedrock leads to a foggy cavern dimension with its dungeons and mithril. From there, the bottom bedrock opens the Nether.

### THE BESTIARY

29 monsters with their own models and voices: dire wolves to tame, gelatinous cubes that digest your items, spiders with glowing eyes, earth and fire elementals.

## PRACTICAL INFO

- Minecraft Java **26.3**, NeoForge **26.3.0.88**, Java **25**.
- The jar goes in the `mods` folder, on the client and the server.
- Start a new world: existing worlds are not supported.
- Single player and multiplayer.
- **Alpha** release: through a first playtest, bugs may remain. Mob voices are reworked vanilla sounds.
- English and French.

## TRANSPARENCY

Hardscrabble is **inspired by MITE** by Avernite, but **not affiliated** with MITE or its author. It is a clean-room rewrite: no code or assets from the original mod.

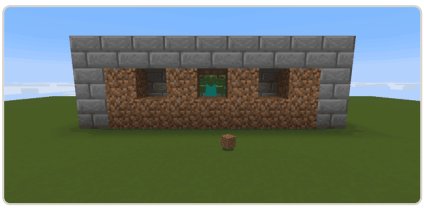

The code, textures, models and documentation were written by **Claude** (Anthropic's AI), directed by nogaruki, who designed, playtested and reviewed the mod.

Code under LGPL-3.0, assets under CC BY 4.0.

## Screenshots and animations

No logs with bare hands: you need a flint hatchet.

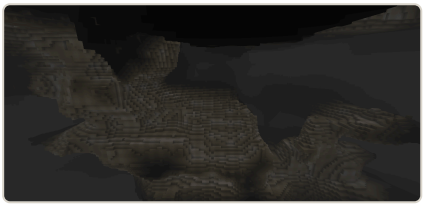

Zombies dig their way to you.

Timed crafting, with a target quality paid in XP.

The blood moon rises.

The Underworld, under the bedrock.

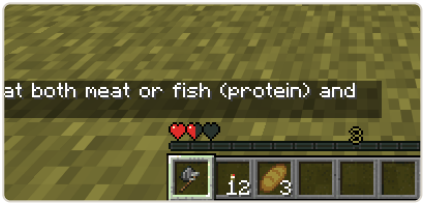

The undead: bone lords, ghoul, revenant, shadow…

Tamed dire wolves, collar and scute armour.

Tools, from flint to adamantium.

Satiety, nutrition and 3 hearts to start with.

Every screenshot in full resolution (over 120, GIFs included) is in the repository's docs/media folder. Feel free to use them in your videos and thumbnails.
